DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7, 23, 30, and 57 are rejected under 35 U.S.C. 102(b) as being anticipated by Magruder, et al., Peery, et al., or Balaban, et al. Both cited patents disclose a semipermeable body including a hollow interior portion having a size selected to obtain a predetermined liquid penetration rate through the semipermeable body, the liquid penetration rate, the liquid penetration rate for controlling a delivery rate of a beneficial agent.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

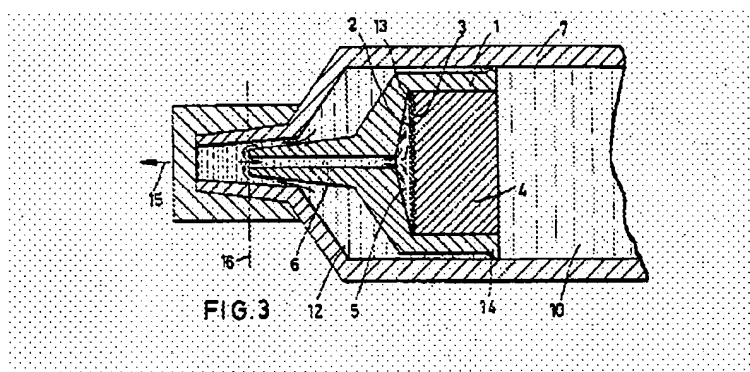

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

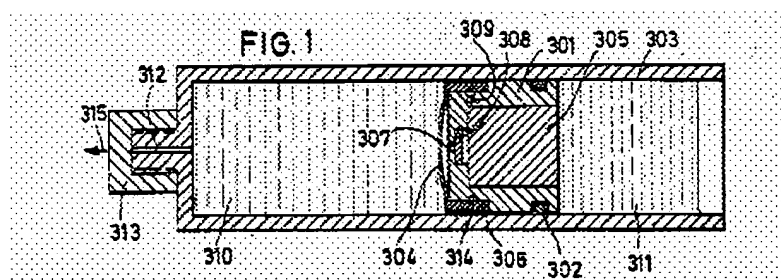

Art Unit: 3763

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 8-22, 24-29, 31, 58-63, and 65-66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Magruder, et al., Peery, et al., or Balaban, et al., in view of Nussbaumer, et al. The Magruder, et al., Peery, et al., or Balaban, et al. Patents do not disclose a conical plug for the infusion of a beneficial agent. Nussbaumer, et al., teaches the use of a conical and cylindrical plunger for the infusion of fluids in syringes.

In figure 3, Nussbaumer, et al., shows the use of a conical plunger (2) for the infusion of fluids.

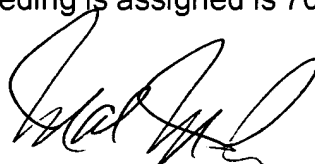

In figure 1, Nussbaumer, et al., shows the use of a cylindrical plunger (301) for the infusion of fluids.

Based on the teachings of Nussbaumer, et al., for a person of ordinary skill in the art, it would have been obvious to modify the plugs of Magruder, et al., Peery, et al., or Balaban, et al., with a conical shape plug. Additionally, such modification would have been considered an obvious design choice.
